re only valid online!

recently been added to our range.

The screenshot shows the PMA TOOLS website interface. At the top, it says "Logged in as: 70000". Below this, there's a table with columns: Order no., Your Comments, Date, Dispatch date, Done, and Details. The table contains several rows of order data. On the right side, there's a sidebar menu with links: Start page, Specials, New Products, Back orders, and Basket. Below the menu, there's a "Product search" section with a text input field and a "Search" button. At the bottom of the sidebar, there's a "Logout" button.

HAND TOOLS

	TYPE	DESCRIPTION	ILLUSTRATION
	Cord runner (short) Part No. 01 01 01 01	The cord runner (short) is suitable for pulling in most rubber surrounds on vehicle car windows. Cord length: 6 m	
	Cord runner (long) Part No. 01 01 01 02	The cord runner (long) is suitable for pulling in most rubber surrounds on vehicle truck windows. Cord length: 8 m	
	Replacement cord for cord runner Part No. 01 01 01 03	For replacing the short or long cords on cord runner. Length: 9 m	
	Lift pin (short) with wooden handle Part No. 01 02 01 00	The lift pin is used for lifting rubber lips from the inside and the outside. Chrome-vanadium spike, varnished wooden handle	
	Lift pin (short) Part No. 01 02 01 01	The lift pin (short) is used for lifting rubber lips from the inside and the outside. Curved metal pin, plastic handle	
NEW!	Lift pin (short) "professional" Part No. 01 02 01 07	This new lift pin short professional is a made from high strength tool steel which offers greater durability and extended life. The two component handle is covered with a soft foam coating for easy grip.	
	Lift pin (long) Part No. 01 02 01 02	The lift pin (long) is used for lifting rubber lips in problem areas (e.g. dashboard). Tip curved through 90°, plastic handle	
NEW!	Lift pin (long) "professional" Part No. 01 02 01 06	This new lift pin long professional" is a made from high strength tool steel which offers greater durability and extended life. The two component handle is covered with a soft foam coating for easy grip.	

HAND TOOLS

	TYPE	DESCRIPTION	ILLUSTRATION
	Ball-head pin (short) Part No. 01 03 01 01	The ball head pin (short) is used for cleaning and lifting the seal. Ball-head, plastic handle	
NEW!	Ball-head pin (short) "professional" Part No. 01 03 01 03	This new generation of the PMA/TOOLS ball pin short professional is made from high strength tool steel which offers greater durability and extended life. The two component handle is covered with a soft foam coating for easy grip.	
	Ball-head pin (long) Part No. 01 03 01 02	The ball head pin (long) is used for cleaning and lifting the seal. Ball-head, plastic handle	
NEW!	Ball-head pin (long) "professional" Part No. 01 03 01 04	This new generation of the PMA/TOOLS ball pin long professional is made from high strength tool steel which offers greater durability and extended life. The two component handle is covered with a soft foam coating for easy grip.	
NEW!	Ball-head pin XL "professional" Part No. 01 03 01 05	This new PMA/TOOLS ball pin XL professional is designed for use in areas that are hard to reach, e.g. truck and bus dashboards. Made from high strength tool steel, it offers greater durability and extended life. The two component handle is covered with a soft foam coating for easy grip.	
NEU!	Assembly tool for truck rubber Bestell-Nr. 01 11 02 03	This newly developed long handled tool is designed to remove the solid rubber surrounds from truck and bus windscreens.	

TOOLS/ACCESSORIES

HAND TOOLS

HAND TOOLS

TYPE	DESCRIPTION	ILLUSTRATION
Mini clip removal tool set Part No. 01 02 01 04	<p>The various shapes of the removal tools in this set are just right for non-destructive removal of plastic covers on scuttle panels, A pillars, or door trims. The removal tools are also very well suited to release decorative trim clips.</p>	
Cleaning pin (straight) Part No. 01 04 03 01	<p>The cleaning pin (straight) is used for removing tempered glass remnants from mouldings and rubbers.</p> <p>90° angled metal pin</p> <p>Length : 20 cm</p>	
Cleaning pin (curved) Part No. 01 04 03 02	<p>The cleaning pin (curved) is used for removing tempered glass remnants from mouldings and rubbers.</p> <p>90° angled metal pin</p> <p>Length: 21 cm</p>	
Fitting tool for VW Universal profile Part No. 01 06 50 24 <p>This PMA/TOOLS fitting tool represents an innovation with regard to precision and time-saving application of our VW universal profile 5024-27. The moving press-on roller integrated into the tool head presses the profile section automatically onto the windscreen ceramic field.</p>	<p>The profile section can be laid parallel to the glass edge even in corner areas with a radius of up to 135°.</p> <p>The Profixx application poster is available with this tool on request.</p>	
Weatherstrip pull-in tool 20 mm eye with roller Part No. 01 06 01 09	<p>For pulling in wide weatherstrips.</p> <p>(e. g. BMW E28, Opel Monza)</p>	
Replacement eye with roller Part No. 01 06 11 17	<p>Replacement eye with roller 20 mm.</p> <p>For Part No.: 01 06 01 09.</p>	
Weatherstrip pull-in tool (soldered eye, 15 mm) Part No. 01 06 02 01	<p>For pulling in weatherstrips for windcreens and rear windows (Ford Escort, Opel Ascona).</p>

HAND TOOLS

	TYPE	DESCRIPTION	ILLUSTRATION
	Professional Strip Lifter Part No. 01 11 02 02 Strip lifters are used for removing trim strips held in place by fastening clips, interior trim and scuttle panels. The special bending form creates extreme leverage making the parts easier to remove. Our Professional Strip Lifter is also excellent for	the removal of passenger and commercial vehicle windscreens fitted with solid rubber.	
	Seal lever polypropylene Part No. 01 25 09 07	The special combination of the right plastics makes this tool suitable for a variety of uses.	
	Easy Lift windscreen wiper remover Part No. 01 11 17 02 A new development. Our Easy Lift wiper remover has a very long service life and is easy to use on nearly all well-known wiper systems. Because of its very low overall height of 48 mm, our wiper remover can be used without problem underneath opened engine hoods and preformed scuttle panels. On the latest generation of vehicles (Volvo, BMW etc.), the wiper arms have predetermined breaking points on the reverse	side so as not to cause any further injuries in the event of frontal collisions with pedestrians. The predetermined breaking points makes the wiper arm more unstable so that it breaks easily if excess side pressure is applied. The usual method of removal by side leverage or waggling the wiper arm back and forth would result in the wiper arm breaking. Avoid annoying damage to customer vehicles and use our new Easy Lift wiper remover.	
	Windscreen wiper remover 2-armed Part No. 01 11 17 03	Tool for removing large or sticking wiper arms. Screw mechanism with two adjustable swivel arms.	
	BMW Torx windscreen wipers Part No. 01 11 17 11 This BMW original tool is necessary for removing wiper arm 80 torx on BMW models of the 5 series E39, 7 series E38 and 8 series E31. The torx nut can be used in any standard commercial ratchet wrench. Use the BMW wiper	remover, Art. No.: 01 11 17 12, in order to remove the wiper arm from the lever after removing the torx screw.	
	BMW windscreen wiper remover Part No. 01 11 17 12	This wiper remover designed specially for BMW is used for removing wiper arms on the above mentioned models.	
NEW!	BMW New Mini Cooper Sidelight adjustment tool Part No. 01 11 17 13 This original BMW Mini tool is used to adjust the frameless front sidelight. In case of the special electronical sidelight movement the new glass must be adjusted as specified by BMW.	Improper installation and adjustment causes wind noise and leakage. The tool could be used for the Mini Cooper and the Mini Cooper Convertible.	
	MAN TGA Spacers (special tool) Part No. 01 11 17 16 These MAN spacers have been specially developed for fitting the front windscreen on the TGA. The spacers are placed on the left and right wiper arms before fitting the windscreen. The spacers ensure that the heavy windscreen	does not drop down once fitted. The spacers are removed before fitting the bonnet, according to skin formation or hardening time. Packing unit: 2 items	

HAND TOOLS

TYPE	DESCRIPTION	ILLUSTRATION
MAN TGA Fitting wedges (special tool) Part No. 01 11 17 15 These MAN fitting wedges have been specially developed for fitting the front windscreens of all TGA versions. The wedges are put on specially marked A-pillar bodywork strengtheners before fitting the windscreen.	Using the two A-pillar wedges exact positioning of the windscreen on fitting is ensured. Packing unit: 2 items	
Hexagon socket screw key (2 sizes) Part No. 01 12 18 01	Special tool for the removal of rear-view mirrors fastened with hexagon socket screws. (2 mm + 2,5 mm). Length: 10 cm	
Torx key (2 sizes) Part No. 01 12 18 02	The Torx key is suitable for removing rear-view mirrors or mounted parts. (T15 + T20). Length: 10 cm	
Magnetic tray Part No. 01 14 20 02	This magnetic tray helps with the safe storage of nuts and screws during work. The magnet on the underside is coated with plastic to prevent any damage to paint.	
Telescopic magnet Part No. 01 14 20 03	This telescopic magnet makes it possible to pick up screws and nuts which have fallen into areas which are difficult to reach.	
Special bumping mallet Part No. 01 14 22 01	Enables windscreen to be knocked out without damages. Rubber body: 70 x 140 mm Weight: 1270 g	
Mirror base pliers Part No. 01 15 50 01 The replaceable plastic jaws enable rear-view mirrors to be removed without scratching.		Part No. 01 15 50 02

TYPE		DESCRIPTION	ILLUSTRATION
NEW!	Cold cutting knife Part No. 02 17 01 13 This tool is suitable for all "single" glued windows. The soft blue cover helps to prevent damages to hands and vehicles.		Replacement pull-cord with grip Part No. 02 17 01 14 
	Cold cutting knife Quick Fix Part No. 02 17 02 14 Cold cutting made easy! Due to the Quick Fix mechanism the blade change only takes five seconds.		
NEW!	Cold cutting knife fully adjustable Part No. 02 17 01 15 The advantages of the new lever operated cold cut-out knife are: 1) The quick release handle allows blades to be changed very quickly and safely. 2) As more and more vehicles have differing heights of pinchweld on the A-pillar section, the fitter can adjust the height of the blade whilst still	cutting and thus avoid the back edge of the knife blade from touching or scratching the body/paint-work. 3) The ergonomic handle fits more comfortably into the hand, which is especially important when changing cutting direction or adjusting the blade height. The new lever operated cold cut-out knife accepts all 19, 25 & 38 mm blades from our range.	
	Cold cutter spare blades 19 mm Part No. 02 17 02 15 1 piece Part No. 02 17 02 15-10 10 pieces Cold cutter spare blades 25 mm Part No. 02 17 02 16 1 piece Part No. 02 17 02 16-10 10 pieces Cold cutter spare blades 38 mm Part No. 02 17 02 17 1 piece Part No. 02 17 02 17-10 10 pieces	Suitable for all cold knives of our range. – Made of high quality steel – Special coining and heat treating – Compounded sharper angles – Brand quality "UltraWiz"	
NEW!	Cold cutter spare blades 19 mm thin Part No. 02 17 02 23 1 piece Part No. 02 17 02 23-10 10 pieces Cold cutter spare blades 25 mm thin Part No. 02 17 02 24 1 piece Part No. 02 17 02 24-10 10 pieces Cold cutter spare blades 38 mm thin Part No. 02 17 02 25 1 piece Part No. 02 17 02 25-10 10 pieces	Suitable for all cold knives of our range. – Made of 40% thinner carbonsteel – Special coining and heat treating – Compounded sharper angles – Perfect for vehicles with limited working space is limited – Brand quality "UltraWiz"	
	Cold cutter spare blades 19 mm Part No. 02 17 02 20 1 piece Part No. 02 17 02 20-10 10 pieces Cold cutter spare blades 25 mm Part No. 02 17 02 21 1 piece Part No. 02 17 02 21-10 10 pieces Cold cutter spare blades 38 mm Part No. 02 17 02 22 1 piece Part No. 02 17 02 22-10 10 pieces	Suitable for all cold knives of our range. – Made of stainless steel – Special coining and heat treating – Compounded sharper angles – Resists twisting and bending – Brand quality "UltraWiz"

NEW!

This windscreen table with the self-locking tubular construction allows for quick assembly and easy transport. As it is adjustable in width, it fits to the contours, shapes and sizes of most windscreens.

Disassembled the Adjustable Windscreen Table requires only minimal storage area. Contrary to

TOOLS/ACCESSORIES

WINDSCREEN STANDS + SUCTION LIFTERS

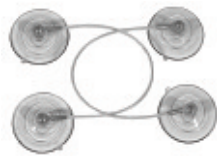

TYPE	DESCRIPTION	ILLUSTRATION
Truck/BUS windscreen stand Part No. 04 20 01 03 This newly designed screen bench can take loads up to 120 kilograms. This makes it ideal for bearing large and heavy truck and bus windcreens. The foam cover holds the windscreen in the required position even under side pressure. The chains on the side make it possible to adjust the height and the distance between the	foam layers. Accordingly this windscreen bench is also suitable for working on smaller side windows. Load capacity 120 kg	
Replacement rubber feet for windscreen stand Part No. 04 20 01 04	Rubber feet. Suitable for windscreen stands 04 20 01 01 and 04 20 01 01R.	
Spare rubber suction pads Part No. 04 20 01 00	Suitable for Windscreen stands 04 20 01 01 and 04 20 01 01R.	
Wheel Step ladder Part No. 04 20 01 10	This adjustable step is placed over the tyre on the front wheel of the vehicle and allows the fitter to "step up" to reach the top of the windscreen of most commercial vehicles (light and heavy commercials) without the need for additional ladders etc Load capacity 225 kg, can be used on most vehicles.	
Double suction lifter blue Part No. 04 21 29 01	This suction holder is especially designed for installing windcreens and is suitable for any windscreen curvature due to its two jointed heads. Maximum load capacity 80 kg Made in Germany	
Double suction lifter blue Part No. 04 21 29 03 The new big rubber cups of this double suction lifter make working easy. The suction pads adhere to the glass surface on the slightest application of pressure. In conjunction with the movable	heads, best adhesion on tightly curved screens is ensured. The handle has a slit for the lashing strap. Maximum load 80 kg Made in Germany	
Profixx double suction lifter adjustable (socket shape) Part No. 04 21 29 11 Double suction cup lifter in established made in Germany quality with wide cups for better fixation in bended glass areas. Specialty equipped with a patent pending adjustable handle the new PMA lifter offers the possibility to adjust the fitted screen precisely. Just for the PU extruded Volkswagen screens with very narrow upper gaps between glass edge and pinchweld	this new suction cup is perfectly usable for finding and adjusting the right screen position. Maximum load 80 kg Made in Germany	

WINDSCREEN STANDS + SUCTION LIFTERS

TYPE	DESCRIPTION	ILLUSTRATION
Replacement rubber cup for double suction lifter Part No. 04 21 29 05	Large replacement rubber cup to fit the double suction lifter. Made in Germany	
Double suction lifter Veribor Part No. 04 34 04 33	This suction lifter is specially designed for installing windscreens and is suitable for any windscreen curvature due to its two jointed heads. Maximum load capacity 80 kg Made in Germany	
Replacement rubber cup Part No. 04 34 04 34	Suitable for both of the double-jointed suction holders Part No.: 04 21 29 01 and 04 34 04 33. Made in Germany	
Single suction lifter Part No. 04 21 29 02	This suction holder is particularly suitable for the installation of all windscreens, rear and side windows. The suction holder is fastened onto the glass by simply closing the handle. Load capacity: 50 kg	
Single suction lifter Pannkoke Part No. 04 21 29 07	This suction pad is particularly suitable for insertion and removal of extremely curved glass. Dimension: 250 mm	
Bow handle for suction pad Part No. 04 21 29 08	Using the bow handle, the individual fitter can install windscreens and rear windows safely on-site without outside help.	
Powr-Grip pump suction lifter Part No. 04 21 29 04	This pump suction lifter is particularly suitable for carrying heavy and large truck and bus windscreens as well as plate glass panes weighing up to 200 kilograms. Attach the Powr-Grip suction lifters to flat areas on very curved screens in order to avoid the lifters coming off when lifting.	
Moulding suction clamp Part No. 04 21 03 06 1 piece Part No. 04 21 03 06-6 6 pieces	For fastening glued cover mouldings (e. g. Toyota Corolla, Nissan Sunny, Mazda 626). The strip is fastened into position by constant pressure.

Doorglass window holders Part No. 04 21 03 05	This sidelight holder allows free-fastening of side windows so that the door winding elements can be prepared without any problem.	
Lashing strap (cars) Part No. 04 21 29 06	This lashing strap is used for fastening car wind-screens. Use the belt in case the windscreen is still vibrating after installation. Length: 6 m	
Lashing strap (Truck/bus) Part No. 04 21 29 10	This lashing strap is used for fastening truck/bus wind-screens. Use the belt in case the windscreen is still vibrating after installation. Length: 10 m	

GLASS TREATMENT

TYPE	DESCRIPTION	ILLUSTRATION
Ombrello: The water and dirt-resistant glass treatment Part No. 13 35 60 03 <ul style="list-style-type: none"> New type of glass treatment in original equipment quality. Penetrates the glass top layer by chemical reaction and seals the surface so that water drops and dirt are carried away by the air stream at speeds over 60 km per hour. Water rolls off immediately even in the worst weather conditions such as rain and snow. Blinding effect by scattered light is avoided. Highly adhesive insect remains are removed easily by the windscreen wipers. The wiper blades last longer and attrition on the screen surface is reduced. Frost and ice on the windscreen can be removed more easily. Ombrello sealant only has to be renewed every 20,000 kilometres - depending on the frequency of wiper use. 	<ul style="list-style-type: none"> Research carried out by well-known institutes have shown that Ombrello improves vision by 34% by day and by night. Reaction times are reduced by a second so that the braking distance is reduced by 27 metres at a speed of 100 kilometres per hour. Only suitable for real glass. Not to be used with plastic or macrolon surfaces. <p>Tip: Be sure to observe the Ombrello instructions for use!</p>	
Ombrello Precleaner 180 ml Part No. 13 35 60 02 <p>This precleaner developed specially for Ombrello glass seals removes all dangerous contamination from laminated and toughened safety glass and lengthens the service life of the sealing. The zinc baths used for floating laminated glass leave an invisible layer on the outer side of the winds-</p>	<p>creen. This zinc layer leads to the formation of streaks on the windscreen and windscreen wiper wobble if the surface is not cleaned correctly. For ideal pre-cleaning of the windscreen, use Ombrello Preclean in combination with a suitable polishing machine (3M) or orbital sander (with felt disc).</p>	

GLASS TREATMENT

TYPE	DESCRIPTION	ILLUSTRATION
Contact 350 ml Part No. 13 35 60 14A This glass contact cleaning fluid cleans the glass surface in preparation of the Ombrello glass treatment, by removing traces of paint, cleaning residues, wax, grease and tar. As the contact cleaning fluid contains microscopic	abrasive particles, it is essential to use a water spray in conjunction with the fluid when applying to the windshield or other glass surface to ensure that any abrasive marks are avoided.	
Ombrello demonstration jar Part No. 13 35 60 04	Demonstrates convincingly to your customers the unique effect of Ombrello glass sealant.	
Ombrello brochure (German) Part No. 13 35 60 12 1 piece Part No. 13 35 60 12-50 50 pieces	Detailed and convincing information about the quality, long-life and effects of Ombrello for your customers.	
Ombrello counter display Part No. 13 35 60 06	For the presentation of Ombrello products in counter and customer areas.	
Ombrello wall chart A1 (German) Part No. 13 35 60 18	For a professional presentation on your premises or at trade fairs.	
High-quality micro-fibre cloth Part No. 13 35 60 08 Perfect cleansing cloth for use with Contact Cleaning Fluid. Enables vehicle windscreens to be cleaned without chemical detergents and just with clean water. Reduces the use of glass detergents and guarantees best possible results.	Tip: Sell your Ombrello customer a high quality micro-fibre cloth for cleaning vehicle windscreens. Your customer won't need any windscreen detergent any more and can clean the windscreen at any time and anywhere. Washable at 90° C Dimensions: 32 cm x 36 cm	

FEIN CUT - OUT TECHNIQUE

TYPE	DESCRIPTION	ILLUSTRATION
Fein cutter FSC 1.6 Part No. 06 27 10 01 The newly developed Fein Super Cut 1.6 continues the successful tradition of the Fein auto glass cutters. The Super Cut 1.6 offers the following benefits: Reduced heat build-up as a result of modified motor (repairs for overheating are avoided / longer tool life) Ergonomically designed grip on the cutter (easier to use). Reduction in vibrations (runs more smoothly and gives preciser working). Weight reduction in the order of 250 g	Technical data: Nominal power intake 400 W / Power output 240 W Vibrations 10,000- 18, 700 1/min. Weight 1.3 kg Contents: 1x Fein cutter FSC 1.6 1x sharpener 1x clamping screw 1x spanner 1x metal box	
Pneumatic cutter Part No. 07 26 29 01 Operates with an oscillating knife head. The knife head has an oscillation range of 1.000 – 20.000 rpm. The advantage of the compressed air version is a longer service life because of the continuous machine cooling by the flow of com-	pressed air. High-quality alternative to electronic Fein machines!	
Fein knife 087 U. knife 18 mm Part No. 06 28 10 11	This blade in U-form with 18 mm blade is used for removal from the outside. Particularly suitable for Passat IV. Packaging unit: 2 pcs.	
Fein knife 076 U. knife 24 mm Part No. 06 28 10 03	This blade in U-form with 24 mm blade is used for removal from the outside. Packaging unit: 2 pcs.	
Fein knife 079 U. knife 36mm Part No. 06 28 10 04	This blade in U-form with 36 mm blade is used for cutting from the outside just like the 076 knife. Packaging unit: 2 pcs.	
Fein knife 115 U. knife 22mm Part No. 06 28 10 32	This blade in U-form with 22 mm blade is used for cutting from the outside. Packaging unit: 2 pcs.	
Fein knife 114 U. knife 32mm Part No. 06 28 10 31	This blade in U-form with 32 mm blade is used for cutting from the outside. Packaging unit: 2 pcs.	
Fein knife 101 U. knife 60mm Part No. 06 28 10 19	This blade with wide U-form and 60 mm blade is used for removal from the outside- e. g. dashbo- board section W124. Packaging unit: 2 pcs.	

FEIN CUT - OUT TECHNIQUE

TYPE	DESCRIPTION	ILLUSTRATION
Fein knife 210 U-shaped 19 mm Part No. 06 28 10 78 The new 210 Fein knife is a reinforced version of the well-known U-shaped Fein knife. In addition the inside of the cutting edge is serrated. Both modifications give longer tool life, espe-	cially on modular or hard-glued windscreens, and allow good direction whilst cutting. Packaging unit: 2 pcs.	
Fein knife 210 U-shaped 25,5 mm Part No. 06 28 10 79 The new 211 Fein knife is a reinforced version of the well-known U-shaped Fein knife. In addition the inside of the cutting edge is serrated. Both modifications give longer tool life, espe-	cially on modular or hard-glued windscreens, and allow good direction whilst cutting. Packaging unit: 2 pcs.	
Fein knife 210 U-shaped 38 mm Part No. 06 28 10 80 The new 212 Fein knife is a reinforced version of the well-known U-shaped Fein knife. In addition the inside of the cutting edge is serrated. Both modifications give longer tool life,	especially on modular or hard-glued windscreens, and allow good direction whilst cutting. Packaging unit: 2 pcs.	
Fein knife 073 P. knife 35 mm Part No. 06 28 10 02	This straight blade with 35 mm blade is used for removing bus windscreens. Packaging unit: 2 pcs.	
Fein knife 081 G. knife 60 mm Part No. 06 28 10 06	This straight blade with 60 mm blade is used for removal from the inside in areas where the PU beading is very difficult to get at. Packaging unit: 2 pcs.	
Fein knife 171 G. knife 64 mm Part No. 06 28 10 68	This straight blade with 64 mm blade is used for removing from the inside. Packaging unit: 2 pcs.	
Fein knife 125 G. knife 70 mm Part No. 06 28 10 40	This blade is used for front/rear/side windows which are difficult to get at. Use from the inside of the window. Packaging unit: 2 pcs.	
Fein knife 104 Spoon 35 mm Part No. 06 28 10 22	This blade with 35 mm blade in spoon shape is bent through 90° and is used for removal from outside. Particularly suitable for Passat B5 and Golf B4 Windscreens, upper part. Packaging unit: 2 pcs.	

TOOLS/ACCESSORIES

FEIN CUT - OUT TECHNIQUE

TYPE	DESCRIPTION	ILLUSTRATION
Fein knife 120 Spoon 14 mm Part No. 06 28 10 35 	<p>This 14 mm blade in spoon shape is bent through 90° and is used for removal from outside.</p> <p>Tip: Particularly suitable for the removal of VW rear Windows (e. g. Golf III, Golf IV, Passat V).</p> <p>Packaging unit: 2 pcs.</p>	
Fein knife 207 L-shaped 25.4 mm Part No. 06 28 10 71 <p>The L-knife 207 from the company Fein has a cutting surface of 25.4mm and is particularly for removing framed vehicle screens because of its form and the saw edge. The saw edge makes it possible to cut simultaneously polyurethane and frame section which are pre-applied on the</p>	<p>glass. Windscreens can also be removed without problem from vehicles where only a very narrow space between the edge of the screen and the bodywork (e. g. roof section of VW models) is left, because the blade oscillates parallel to the screen edge.</p> <p>Packaging unit: 2 pcs.</p>	
Fein knife 208 L-shaped 19 mm Part No. 06 28 10 72 <p>The new generation of Fein L-knives with 208 blade offers a universal knife with a 19mm cutting surface. The form and saw edge makes it particularly suitable for removing framed vehicle windscreens. Cutting high-modular adhesives is absolutely no problem with the saw edge.</p>	<p>Windscreens can also be removed without problem from vehicles where only a very narrow space between the edge of the screen and the bodywork (e. g. roof section of VW models) is left, because the blade oscillates parallel to the screen edge.</p> <p>Packaging unit: 2 pcs.</p>	
Fein knife 209 L-shaped 38.1 mm Part No. 06 28 10 74 <p>This Fein L-knife with a cutting edge of 38 mm has been specially designed for the latest generation of Trucks and buses. The screens of the new MAN TGA and MAN City Bus NL 202 models can be removed without any problem with the</p>	<p>079 Fein blade after carrying out the V-cut. Cutting PU beading widths up to 35 mm is absolutely no problem with the saw edge of the 209 blade.</p> <p>Packaging unit: 2 pcs.</p>	
Fein knife 217 Hook-shaped 38 mm Part No. 06 28 10 81 <p>The new 217 Fein knife of so-called hook-shape is a completely new blade development, to be used only from outside.</p> <p>The special notch extending beyond the curved area of the blade, allows separation of joined glass panes without making a V cut first. The</p>	<p>217 blade has been specially developed by the Fein company for utility vehicle and bus manufacturers, who have vehicle-specific requirements in relation to glue beading width and position. Excellent for all glued utility vehicle and bus windscreens.</p> <p>Packaging unit: 2 pcs.</p>	
Fein knife 194 knife 110 mm Bestell-Nr. 06 28 10 85 <p>This new straight Fein Knife blade 194 can be used either from the inside of the vehicle, or from the outside when cutting out coach windscreens and sidelights. The series of holes spaced along the blade help reduce the cutting</p>	<p>resistance normally present when removing the wider and deeper polyurethane beads.</p> <p>This blade may also be used to remove the reinforcement struts usually found in roof panels.</p> <p>Packaging unit: 2 pcs.</p>	
Fein auto glass set Part No. 06 28 10 77 <p>The Fein auto glass set contains all major new blades needed for removing modular and tight fitting (small gap between windscreen and bodywork) windscreens.</p> <p>9 blades in cardboard box</p>	<p>Set contents:</p> <ul style="list-style-type: none"> 3 x 207 L-shaped cutting blades with 25.4mm blade 2 x 208 L-shaped cutting blades with 19 mm blade 1 x 209 L-shaped cutting blade with 38 mm blade 1 x 157 reinforced U-shape cutting blade with 60 mm blade 1 x 111 reinforced U-shape cutting blade with 95 mm blade 1 x 212 reinforced U-shape cutting blade with 38 mm blade 	
Fein Saw Blade HSS 80 mm Part No. 06 28 10 69 <p>This Fein saw blade is particularly suitable for removing roof bows during sun roof installation. The oscillating Fein cutting system enables the HSS saw blade to be fed through various materi-</p>	<p>als without any additional effort. It can be used to cut all kinds of metal and plastic.</p>

CARTRIDGE GUNS

TYPE	DESCRIPTION	ILLUSTRATION
Battery powered cartridge gun, 4.8 volts for 310 ml cartridge and 400 ml bag Part No. 09 33 06 01 The Powerhand cartridge gun is based on a new plunger release mechanism. The high ejection pressures of 3,000 N, as well as the 4.8V of power, allow ease of working with modular PUR adhesives. Even HM products are easy to work. This Powerhand battery powered gun can be used for 310ml cartridges, as well as 400 ml bags.	Technical data: Weight: 3.1 kg overall pack/2.1 kg gun Capacity: About 45 cartridges on one battery charging Feed rate: About 2.5 - 15 cm/min. Ejection pressure: 3000 N After-running: No after-running of sealant as a result of electronic pressure release Contents: 1x battery powered cartridge gun 1x 4.8 volt battery 1x charger 1x bag-plunger cap	
Battery powered cartridge gun 4.8 volts for 400/600 ml bags Part No. 09 33 06 00 This Powerhand battery powered gun is also fitted with the new plunger release device. High ejection pressure capacity of 3,000 N ensures ease of working with modular PUR adhesives. This Powerhand battery powered gun can be used for working with 310 ml cartridges, 400 ml and 600ml bags.	Technical data: Weight: 5.3 kg overall pack/2.15 kg gun Capacity: About 35 bags (600 ml) on one battery charging Feed rate: About 2.5 - 15 cm/min. Ejection pressure: 3000 N After-running: No after-running of sealant as a result of electronic pressure release Contents: 1x battery powered cartridge gun 1x plastic case 1x 4.8 volt battery 1x charger 1x bag-plunger cap	
Replacement battery 4.8 volts Part No. 09 33 06 02 4.8 volt replacement battery for Powerhand cartridge and bag battery powered gun.		Recharger 4.8 volts Part No. 09 33 06 03

NEW!	Battery powered cartridge gun PC COX Electraflow 14.4 V for 310 ml cartridge and 400 ml bag		
	Bestell-Nr. 09 33 05 70 Powerful, Efficient and effortless applicators. This new cordless cartridge gun of the new generation Electraflow is equipped with a 14.4 V battery and a recharger. It is designed to dispense modular and even high modular PUR adhesives with ease. It provides great flexibility and enables the professional or industrial user to undertake the most demanding of jobs with confidence. The Electraflow achieves improved efficiencies for all windscreen installations. Fast, efficient and easy application of even the most viscous of adhesives and sealants. <ul style="list-style-type: none"> • Strong construction, long service life • Full range of accessories and spares 	<ul style="list-style-type: none"> • Up to 3000N application force • Non drip function and overload shut off • For 310ml cartridges and 400ml bags Technical Specification: Total weight: 4,2 kg Drive force : 3000N max. No-load speed: 4.0 mm/sec. (10 in/min) Battery: 14.4 V rechargeable NiCad Battery charge time: 1 hour Contents : 1x battery powered cartridge gun 1x plastic case 1x 4.8 volt battery 1x charger

	Battery powered cartridge gun 7.2 volts for 310 ml cartridge and 400 ml bag		
	Part No. 09 33 05 90 The Powerhand cartridge gun is based on a new design plunger release mechanism and can produce high ejection pressures, through the 7,2V power unit. It is very suitable for dispensing high modular Polyurethane adhesives. This Powerhand battery powered gun can be used for 310ml cartridges, as well as 400ml bags and all mechanical parts are now made of V2A steel.	Technical Data: Weight: 2,26 kg Capacity: approx. 45 cartridges with one charging Feed rate: approx. 2,5-15cm/min Ejection press.: 3800 N Run-out: No additional product extrusion when trigger is released	
	Replacement battery 7,2 volts		
	Part No. 09 33 05 92 7,2 volt replacement battery for Powerhand cartridge and bag battery powered gun.		Recharger 7,2 volts Part No. 09 33 05 93 
	Battery powered cartridge gun Pressofix 208 Electronic 2.4 volts		
	Part No. 09 33 06 04 Regulation of feed rate on a ratio of 1:6 for particular good adjustment to suit different joint widths, filling materials and nozzle widths. The Pressofix 208 electronic stops the flow of adhesive immediately upon completion of application of polyurethane to ensure clean working finish. Tool kit in box consisting of Pressofix 208 electronic, spare re-chargeable AK210 and recharger.	Technical details: Weight: 1600 grams Output: approx. 35 Cartridges with one battery charge Feed rate: approx. 2,5 - 15 cm rpm Ejection pressure: 1500 N Slip clutch: avoids motor blocking with tougher materials Filling display: white/red sector shows full/empty status Cartridges: for standard commercial 310 ml Cartridges	
	Recharger for AK 210 battery		
	Part No. 09 33 06 07 For recharging batteries at 230 V. Built-in overload protector with loading control lamp.		Replacement battery AK 210 Part No. 09 33 06 06

GLASS REPAIR SYSTEMS

TYPE	DESCRIPTION	ILLUSTRATION
PMA TOOLS Impact-Filler 20 ml Part No. 10 46 01 02 This high viscosity UV light hardening impact filler is used for repairing larger surface damage from stone impact. The impact filler with the sealing foil is applied over the damaged area and harde-	ned after filling and hardening the high-viscosity UV repair resin. This professional product guarantees a smooth and homogenous repair.	
PMA TOOLS Repair resin 1,2 ml Part No. 10 45 38 06P	Low viscous, UV-light hardened repair resin which flows extremely well into the damaged area. The product is welded into an aluminium bag protecting it against UV light to ensure a long shelf life.	
PMA TOOLS Impact-Filler 1,5 ml Part No. 10 45 38 14 This high viscosity UV light hardening impact filler is used for repairing larger surface damage from stone impact. The impact filler with the sealing foil is applied over the damaged area and harde-	ned after filling and hardening the high-viscosity UV repair resin. This professional product guarantees a smooth and homogenous repair.	
PMA TOOLS UV-Glass resin primer 10 ml Part No. 10 45 38 30P A transparent coupling agent is necessary if high-quality stone impact repairs are to be carried out using high and low viscosity UV resin. The glass resin primer is applied to the hardened UV resin	surface and acts as coupling agent for the low viscosity impact filler	
Widia drill 0,8 mm Part No. 10 45 38 10	Widia drill noted for its long service life which is guaranteed by high quality raw materials and alloy.	
Injector Part No. 10 46 02 50	High-quality plastic injector for stone damage. The precision machined inner thread ensures an even development of pressure.	
Polish 100ml Part No. 10 45 38 11	This grinding material is used for polishing the hardened UV resin surface.	
Sealing foil 25 piece Part No. 10 45 38 15	This sealingfoil is used for covering the impact point.

	TYPE	DESCRIPTION	ILLUSTRATION
NEW!	Vaccum Pump		
	Part No. 10 45 38 27	This vacuum pump is used to suck the air out of stone chips before the repair begins. Due to the underpressure which is produced inside the broken windscreen section the pump simplifies the whole repair procedure and increases the optical quality of each stone chip repair.	
NEW!	Control mirror		
	Part No. 10 45 38 03	Inspection mirror for stone chip repair.	
NEW!	Duobond Junior fixing		
	Part No. 10 45 38 05	Injection bridge for stonechip repair.	
NEW!	Sucker gel		
	Part No. 10 45 38 12	Sucker gel used on the rubber cups of the injection bridge and the inspection mirror	
NEW!	UV-Lamp 12 volts		
	Part No. 10 45 38 08	Duobond 12 v UV-Lamp for harding the UV-resin.	
NEW!	Connecting cable		
	Part No. 10 45 38 13	Connection cable for the UV-Lamp and the drilling machine.	
NEW!	Drilling machine 12 volts		
	Part No. 10 45 38 16	12 volts machine for drilling and polishing.	
NEW!	Polishing felt pen		
	Part No. 10 45 38 17	Polishing felt pen used with the polish milk and the drillmachine.

Sensor kit Profi Line

Part No. **13 36 01 250**

Today, many of the motor manufacturers are now incorporating sensor technology into the design of their vehicles with the aim to improve comfort and to enhance safety: Rain sensors automatically activate the vehicle's wiper system whenever the windshield becomes water-logged and light sensors automatically switch on the vehicle's lights whenever lighting levels fall below normal daytime driving conditions. We are now seeing a new generation of sensor that control the vehicle cabin humidity levels to eliminate 'fogging' of the windshield.

That is why we at PMA/TOOLS have developed the Sensor Kit "Profi Line", an all-in-one solution for the installer to meet today's comprehensive vehicle accessory installations. Supported by a sensor reference poster which provides important information on all vehicle sensor applications, the new kit comprises an extensive range of sensors, adhesive pads, accessories and cleaning fluids necessary to meet the specific demands of sensor replacement. The Sensor Kit "Profi Line" comes complete in a purpose-built, compact plastic carry case.

All items from this kit are available from our current range and can be re-ordered separately if required.

Adhesive pads for Rain sensor

Part No. **13 36 01 99**

The old Rain sensor can be removed from the screen if exchanging the W210, W203 or BMW E38, E39 bzw. E39 windscreen. Use the PMA adhesive pads to glue the Rain sensor onto the new windscreen.

5 pads in a bag

Rain sensor removal tool for Article K206

Part No. **01 11 02 05**

This special tool is for loosening soft-glued rain/light sensors. Once the screen is removed, the attached sensor is heated wind up on the outside of the screen

using a hot air dryer. The tool must be fitted exactly over the sensor and the old adhesive is loosened using sideways pressure.

Rain/Light sensor MB W203, W209, W211, W220

Part No. **K205**

This Mercedes rain/light sensor can be used on the following vehicles:

Vehicle type	Eurocode
Mercedes E-Class W211 from '02-	5347
Mercedes CLK W209 from '02-	5353
Mercedes C-Class W203 from 05/ '03-	5351
Mercedes Sportcoupé W203 from 07/ '03-	5352
Mercedes S-Class W220 from '03-	5344

On some models the additional module with Part No. K204 is needed.

Rain/Light sensor OEM MB W203, W209, W211, W220

Part No. **13 36 01 296**

This Mercedes rain/light sensor can be used on the following vehicles:

Vehicle type	Eurocode
Mercedes E-Class W211 from '02-	5347
Mercedes CLK W209 from '02-	5353
Mercedes C-Class W203 from 05/ '03-	5351
Mercedes Sportcoupé W203 from 07/ '03-	5352
Mercedes S-Class W220 from '03-	5344

On some models the additional module with Part No. K204 is needed.

Lightsensor Mercedes C-Class MB W203 (2. version)

Part No. **K208**

Part No. **K208-18**

This Mercedes Light sensor can be used on the following vehicles:

Vehicle type	Eurocode
Mercedes C-Class W203 from 05/ '03-	5351
Mercedes Sportcoupé W203 from 07/ '03-	5352

On both C-Class models the additional moduled part. no.: K204 is needed.

Lightsensor Mercedes OEM C-Class MB W203 (2. version)

Part No. **13 36 01 300**

This Mercedes Light sensor can be used on the following vehicles:

Vehicle type	Eurocode
Mercedes C-Class W203 from 05/ '03-	5351
Mercedes Sportcoupé W203 from 07/ '03-	5352

On both C-Class models the additional moduled part. no.: K204 is needed.

Adhesive pads for Rain/Light sensor K205 / K208

Part No. **13 36 01 97**

These adhesive pads for sensors can be used on the following vehicles:

Vehicle type	Eurocode
Mercedes E-Class W211 from '02	5347
Mercedes CLK W209 from '02-	5353
Mercedes C-Class W203 from 05/ '03-	5351
Mercedes Sportcoupé W203 from 07/ '03-	5352
Mercedes S-Class W220 from '03-	5344

PT 310 Sensor Activator 250 ml														
Part No.		13 34 50 45												
PT 310 Sensor Activator 1000 ml														
Part No.		13 34 50 46												
The PT 310 activator is used as a fluid bonding agent in sensor adhesion. After the old sensor has been fitted with the new adhesive pads, the activator is sprayed onto the pads and the sensor area of the windscreen that is free of all screen-printing. Now the optical unit is moved on the windscreen until there are no longer any		air bubbles between the unit and the windscreen. Once correct positioning of the sensor optical units has been determined, press carefully on the sensor. Warm up the windscreen, or the optical unit, with a hot air dryer so that superfluous activator fluid can evaporate. Leave the screen or optical unit to dry at room temperature before refitting so as to avoid later air bubble formation as a result of temperature variation.												

General Terms and Conditions of PMA/Tools Division AG

1.4.2006

1. Order and Acceptance

All deliveries and services of PMA/Tools Division AG, hereafter known as the vendor, arise from the following general terms and conditions of the vendor. Inasmuch as the purchaser is not in agreement with the following, he must declare this in writing to the vendor upon placement of the order at the latest. Terms of the purchaser which deviate from these, and which the vendor does not expressly agree to in writing, are not binding on the vendor. Subsidiary agreements, specific warranties, as well as subsequent changes to the contract terms are only valid if these are confirmed in writing by the vendor. The purchaser is bound by his order for three weeks. Should the purchaser withdraw from an order which has been placed, then the vendor can demand reparation of damages, including any profit lost. For goods which are out of stock, the purchaser is entitled to decline acceptance within three weeks of the placement of order.

2. Prices and Terms of Payment

Prices are based on the vendor's price lists as valid at the time of acceptance, and are valid ex-works of the vendor, but exclude packaging for shipping and VAT at the legal rate. The following holds in regard to shipping costs:

- Delivery within Germany using DPD is free of charge on orders of goods whose net worth is € 50 or more. Orders delivered by DPD must be accepted before 15.00 of the day in question.
- Deliveries by night express are charged. Orders delivered by night express must be accepted before 15.00 of the day in question.
- Shipment by normal means within Germany is free of charge on orders of goods whose net worth is € 500 or more.
- Shipment abroad (EU countries) is free of charge on orders of goods whose net worth is € 2500 or more, but delivery to non-EU countries is charged.

Any changes in price resulting from increase in wage costs, costs of materials or market cost prices are permissible, provided that more than four months separate completion of contract and agreed delivery date. Where the purchaser is a trader, a legally incorporated body, or registered fund assets (hereafter also known as non-consumers), price changes according to the previous ruling are permissible, provided that more than six weeks separate completion of contract and agreed delivery date.

The purchase price and remuneration for additional services become due for payment on handover of the items supplied. Payments are to be made free of charges to the point of payment of the vendor. Payments by cheque are only valid as payment after encashment. The purchaser has no right of retention if the purchaser is a non-consumer. Any set-off by the purchaser is only admissible, inasmuch as his counter claims are expressly undisputed or established as legally binding. In cases of default, the vendor is entitled to levy interest on arrears, in accordance with BGB §288, at 5% above the base rate (in cases where the transaction involves a consumer as defined by BGB §13), or at 8% above the base rate (in cases where the transaction involves a non-consumer). Failing prior agreement to the contrary, the vendor shall supply any purchaser not previously known to him only against cash on delivery, or prepayment, as the vendor shall choose. In the event that as a result of a change in circumstances some threat to claim to payment should arise, the vendor is entitled to exact advance payments of the amount invoiced (BGB §321). The vendor reserves the right to demand down payments.

3. Retention of Title

The goods sold remain the property of the vendor until all valid claims of the vendor arising from his business relationship with the purchaser are met. Until this has happened, any pawning, transfer by way of security or other use of the goods sold is prohibited, subject to the following rulings. As regards use in relation to non-consumers, the following also holds:

The purchaser is entitled to sell on the items supplied as part of the normal course of business, so long as no circumstances become known to the vendor, which might seem to put the settlement of his account on the part of the purchaser at risk. For this reason the purchaser shall already at this junction assign all selling-on claims to the vendor who accepts such assignation, these being claims which have arisen for the purchaser from resale, and this independently of whether the supplied items have been sold on without or after being further worked. The purchaser is empowered to make collection of these assigned accounts until countermanded by the vendor, which may happen at any time. The vendor's authority to make collection of the account himself, remains unaffected by this. If so required by the vendor, the purchaser has a duty to make known his assigned accounts along with the debtors (third parties), to give all details necessary for their collection, to submit all documents pertaining to the matter, and to immediately inform the third party in question of assignment to the vendor, as well as to give proof of this to the vendor. However, the vendor engages not to make collection of the accounts, as long as the purchaser properly meets his payment obligations, and no circumstances become known to the vendor which might seem to put the settlement of his account on the part of the purchaser at risk. In addition, the vendor engages, if requested by the purchaser, to release the collateral he is entitled to, insofar as its value does not exceed that of the accounts to be guaranteed by more than 20%, and insofar as these have not already been settled. Any work on or modification of the goods by the purchaser is always undertaken on behalf of the vendor. If the items supplied are worked along with other items which do not belong to the vendor, then the vendor acquires a part in the title of the new concern, in relation to the ratio of the value of the items supplied to that of the other items worked or modified at the time of working. The same holds if the items supplied are inseparably mixed with others which do not belong to the vendor. The purchaser shall hold the joint ownership in safe keeping for the vendor.

Any access by third parties to goods supplied with retention of title, or to worked or mixed goods, in joint ownership with the vendor, or to accounts assigned by the purchaser, must be immediately referred to the vendor with a view to action being taken. Any costs resulting from intervening action taken by the vendor are to be borne by the purchaser. In the event that the vendor requires restitution of items to which he has title, because circumstances have become known to him, which might seem to put the settlement of his account on the part of the purchaser at risk, the purchaser already hereby declares himself in agreement that those persons engaged by the vendor to make collection may enter, on foot or by vehicle, the site where the items are kept.

4. Delivery, Acceptance and Transfer of Perils

Delivery quantities are determined by the descriptions in the price list and the product catalogue of the vendor, which are valid at the time of conclusion of contract, and unless otherwise provided for in writing at contract confirmation. The right is reserved within the delivery period to make modifications in design or form, due to technical improvements or legal requirements, insofar as the item supplied is not changed in a major way and the modifications are reasonable for the purchaser. Agreements relating to delivery periods and delivery dates do not involve a fixed-term transaction in the legal sense. A delivery date or delivery period is met, if the purchaser is informed before these have expired, that the items are ready to be despatched, or that the items supplied have left the vendor's site. Force majeure entitles the vendor to postpone delivery for the period of the hindrance and an appropriate start-up time thereafter, and to withdraw from the contract for that part which has still not been completed. Force majeure extends to strikes, lockouts, and other circumstances outside the control of the vendor and which seriously exacerbate delivery, to the extent of making it impossible, this independently of whether they occur on the premises of the vendor or his suppliers. Nor does the vendor have to justify these circumstances if they arise in the course of arrears already present. Part delivery is allowed. Choice of mode of shipment shall be made at the vendor's discretion. On handover to the shipper or carrier, and at the latest on leaving the production site of the vendor, all risk, in particular that of possible loss or possible deterioration, is transferred to the purchaser. This transfer of peril is valid also in cases where carriage-free delivery has been agreed. Items delivered are to be received by the purchaser, even if they display small defects. If the purchaser does not accept the item purchased within the period provided for (default of acceptance), the vendor is entitled to dispose otherwise of the goods. The rights of the vendor, to withdraw from the contract after a period of grace and/or demand damages reparation, remain unaffected by this. All items are to be examined by the purchaser immediately on receipt for quantity and quality. Any complaints regarding a consignment are always to be made immediately in writing. In cases of clear defect, complaints can only be countenanced if received until 12:00 at the day of reception of the goods. Costs for inspecting an item held to be defective and which has been returned will be deducted from the credit note, or invoiced separately. The vendor reserves the express right to make further claims regarding damage to the item.

5. Warranty and Liability

The vendor's specifications in catalogues and price lists pertaining to type and item type of the goods, as well as descriptions of the goods, do not serve as guaranteed features of the products. This holds also for the exact suitability and ozone resistance of the products. Once the goods are no longer in the condition in which they were supplied, it is to be assumed that the goods were free of defects on transfer of peril and that any defect now present is due to working or reworking of the goods by the purchaser. Inasmuch as the goods are worked or reworked by the purchaser or other third party in a way other than that specified in the fitting or processing instructions made available to the purchaser, the warranty is not valid, inasmuch as the purchaser is not a consumer. The statutory period of limitation on warranty and liability is 12 months, unless the purchaser is a consumer. Should a replacement delivery of a repaired item not prove satisfactory, only a purchaser who is a consumer has a right to the option of a reduction in price or cancellation of contract. Further claims by the purchaser, including eventual reparation for consequential damages and damages arising from carrying out repairs, are excluded, unless the consequential damages involve damages arising from injury to life, limb and health or the damages are based on premeditated or negligent breach of duty by a legal representative or vicarious agent of the vendor.

6. Property Rights

If the purchaser exports the vendor's goods to areas outside the Federal Republic of Germany, the vendor takes no liability for any possible prejudice to the property rights of third parties resulting from the vendor's products. Should, as a result of such export, a direct claim be made against the vendor by a third party based on prejudice to his property rights, then the purchaser indemnifies the vendor in this sense.

The parties are agreed that all publications (e.g. catalogues, price lists, posters, folders etc.) of the vendor, in the form of texts, illustrations and graphics, be these in written or electronic format, may only be used by the purchaser with the express permission of the vendor. This holds also for purely internal use. The relevant rights of the vendor pursuant to the appropriate provisions of the Copyright Act remain unaffected by this.

7. Indemnity

Insofar as the vendor has a claim to indemnity against the purchaser based on their contract, the vendor can demand 15% of the order value as lump-sum indemnity, without prejudicing the possibility of proving higher actual damages. The purchaser has the right to provide evidence that the extent of damages is lower.

8. Place of Fulfilment, Court of Jurisdiction, Applicable Law

Subject to obligations arising from warranty, the place of fulfilment for all obligations arising from the contractual relationship between the vendor and purchaser is the registered office of the vendor. For any disputes arising from the contractual relationship, if the purchaser is a non-consumer, application must be made to the court of jurisdiction of the registered office of the vendor. The vendor is also entitled to make application to the court of jurisdiction of the purchaser. German law applies for the contractual relationship; the laws of other lands are not valid. In particular the parties agree to exclude the United Nations Convention on Contracts for the International Sale of Goods of 11th of April 1980 (BGBl II 1989, 588 and BGBl II 1990, 1699).

9. Concluding Provisions

Transfer of the rights and duties of the purchaser from the contract concluded with the vendor require the written authorisation of the vendor to become valid.

In the event that these provisions have no legal force or are incomplete in part, the application of the remaining provisions is not thereby to be affected.

Glass Accessories

- Glass adhesive and cleaning products
